

Plasma Physics Patent Applications in Development

System and method of material testing using permittivity measurements

Inventors: Samuel R. Shortes, and Vernon R. Porter – July 15, 2008 – Anderson Remplex

System and method of pathogen eradication on seed products using a cold oxygen plasma discharge

Inventors: Samuel R. Shortes – June 5, 2009 – Anderson Remplex

System and method of creating a reactive oxygen species in water with latent biocidal properties

Inventor: Samuel R. Shortes – July 15, 2009 – Anderson Remplex
